

DIRTT — DOING IT RIGHT THISTIME

DIRTT is a leading technology-driven manufacturer of highly customized interiors. DIRTT combines ICE®, its proprietary 3D design, configuration and manufacturing software, with its integrated in-house manufacturing of its innovative, prefabricated interior construction solutions including: DIRTT Walls, DIRTT Power, DIRTT Networks, DIRTT Millwork and DIRTT Floors. DIRTT continues to grow at a rapid rate generating \$260M in sales last year, with projects and representation in North America, Europe, Asia and the Middle East.

DI5

DI5 is DIRTT's local distribution partner in Atlantic Canada, with many successful installations in all four provinces. DI5's ownership has decades of experience in the local construction market, and seeks to support their success and growth by hiring a forward-thinking, hardworking individual, with an entrepreneurial mindset. The right candidate will seize this unique opportunity to bring innovative construction solutions to the local commercial, healthcare and education markets.

Roles and Responsibilities

DI5's Project Manager will:

- Understand that a DIRTT project is not a product installation. Working with DIRTT is an innovative and unique experience for every client, from initial education through to final walkthrough;
- Simultaneously manage multiple projects from order acceptance through to project close. He or she will represent DI5's business interests on the job site, ensuring a positive customer experience from start to finish; and the installation is carried out seamlessly.
- Assist in creating internal DI5 processes to align with DIRTT's
- Oversee and manage the work of DI5's design team and installation crews to set priorities and tasks
- Be DI5's main point of contact with the client's project team for all communications relating to project implementation
- Manage projects within budget parameters:
 - Thorough understanding of contract requirements
 - Obtain fair and accurate installation quotes
 - Compile and review risk items with DI5 team
 - Track and account for all change orders, deficiencies, and chargebacks
- Understand the scope of work on site and know all the details of a project;
- Attend all job onsite projects meetings and communicate with onsite personnel including the general contractor and sub-trades;
- Understand all local code requirements including construction, millwork, power and networks; and
- Ensure DIRTT solutions are installed to specifications and quality standards as outlined in warranty documents

A DI5 Project Manager can effectively manage these responsibilities because the skills they possess include:

- A high sense of urgency, able to execute tasks efficiently and calmly when multitasking and quick thinking are required;
- A self-motivated and entrepreneurial nature: a problem solver;
- An aptitude with technology and willingness to learn;
- Outstanding interpersonal skills that let them work closely with all project stakeholders as well as DIRTT teammates, including Sales and Design, to manage expectations and ensure the client's experience is a positive one;
- Strong organizational and documentation skills to accurately capture the details of each project and scope of work;

Education and Experience

- A Bachelor of Science degree in building construction or construction management, or PMP designation, or a technical diploma in engineering or architecture; and
- Three to five years of construction, architectural or related experience.
- Previous knowledge of DIRTT's solutions and an understanding of how DIRTT is installed, would be an asset.
- Hands-on experience with Microsoft Office, AutoCAD™ and other 3D software, and an enthusiasm for learning new software programs, are also of added benefit.

Remuneration will be commensurate with experience. Please send resume and cover letter to: Akirk@dirtt.net and fchisholm@iaftd.com . For more information on DIRTT, please visit www.dirtt.net
